Diego de Brito

Data Analyst | Business Intelligence | SQL | Power BI | PL-300 |
Dataviz | DP-600 | ITIL
Belo Horizonte, Minas Gerais, Brazil

Summary

I am a data enthusiast with over 10 years of experience in IT and about 4 years as a data analyst, specializing in database administration and DataViz. I have extensive experience in Business Intelligence (BI) projects, developing reports for organizations such as Petrobras and the Federal Court of Accounts (TCU), utilizing tools like Power BI and Excel.

Throughout my career, I have honed my ability to understand business needs, collaborate with technical teams, and develop effective data solutions. My expertise includes data modeling, dashboard creation, and KPIs development. I am proficient in Microsoft SQL Server, Power BI, MS Office, Knime Analytics, and skilled in SQL and DAX languages.

I work with agile methodologies, such as Scrum, and hold certifications including PL-300 Microsoft Power BI Data Analyst, DP-600, DP-900, and ITIL V4. I also speak advanced Spanish, thanks to an exchange program, and have intermediate conversational skills in English.

Driven by continuous learning, I am always seeking to enhance my abilities and deliver innovative solutions in data analysis and visualization.

Experience

Compass.uol
Data Analyst
November 2023 - Present (1 year 3 months)

Created and maintained dashboards and panels using Power BI, ensuring efficient and visually impactful analyses.

Utilized Azure environment for data optimization and management, contributing to operational effectiveness.

Actively participated in requirements analysis and gathering, ensuring alignment between business needs and implemented solutions.

Made significant contributions to data modeling, ensuring data integrity and quality for analyses.

Experienced in SQL queries for effective and precise data extraction and manipulation.

Responsible for problem analysis and resolution using analytical skills and agile methodologies (SCRUM/SAFE).

Stefanini

Data Analyst

January 2023 - December 2023 (1 year)

Responsible for problem analysis and resolution using analytical skills and agile methodologies (Scrum).

I conducted the analysis and development of ETL processes using Knime, Python, SQL, and Power BI, including the implementation and documentation of routines and projects.

Created and maintained dashboards for the client Petrobras, on demand, with data from internal tools (ITSM) such as ServiceNow, Oracle, and SAP, using Power BI, SQL, Excel, and Knime Analytics.

MSX International

Data Analyst

December 2022 - January 2023 (2 months)

São Paulo, Brasil

- Development of BI Projects in the Automotive sector at Stellantis;
- Support and Maintenance of Existing Panels;
- Analysis and Development of ETL Processes;
- Creation of new analytical reports to improve the decision making of the sectors responsible for selling Stellantis products

Conselho Regional dos Representantes Comerciais

Information Technology Advisor | Data Analyst

April 2019 - November 2022 (3 years 8 months)

Belo Horizonte, Minas Gerais, Brasil
